Peruvian Chocolate <help-desk@truthaboutabs.com>

I don't know about you...

But I don't need an excuse to eat CHOCOLATE :)

Chocolate cake...

Chocolate ice cream...

Chocolate milkshakes...

I love it all!

It's why I was so excited when I found out about the power of a unique type of Peruvian chocolate...

You see, most chocolate is grown over on the west coast of Africa.

But small batches of chocolate also come from the jungles of Peru.

And the difference is astounding.

Peruvian cacao is not only sweet like regular milk chocolate...

It's also one of the healthiest AND highest antioxidant foods on the planet.

Being 12x more powerful than blueberries...

15x better than kale...

And 37x healthier than even broccoli (based on ORAC antioxidant levels)

This delicious chocolatey gift has been the food of emperors for nearly 2,000 years.

And the growing process was finally perfected during the late Incan empire.

Which is what gives us this unique Peruvian chocolate that not only tastes delicious, but can also...

- * Promote healthy and stable blood sugar
- * Reduce free-radicals & fight inflammation, thereby slowing down aging in the body
- * Make you fall asleep faster and STAY asleep through the night
- * Even help preventing brain aging
- * And even contains compounds known to improve your mood

It's no wonder people have been saying things like...

"It has been a wonderful discovery and my body and mind have never been better. My aches and pains are minimal, my gut health has been amazing - gas and cramping is gone!" - Angela Kiesow

"This chocolate is so incredibly delicious, it really feels great to be eating something so healthy and satisfying. I'm losing weight, I feel great, and I have NO food cravings at all during the day!" - Dolores Adkins

"It actually makes me smile every time I eat some, it's that good! It also gives me energy without the jittery side effects of too much caffeine. I used to get a Starbucks Mocha almost every day, and this healthier drink has taken its place." - Jennifer Wilson

There is only ONE season a year that they grow this unique South American chocolate...

So make sure you get some BEFORE the end of this years growing season.

Find out the details on this page:

>> **This unique Peruvian chocolate is significantly healthier than kale** (tastes incredible AND packs more inflammation-fighting antioxidants than ANY vegetables)

Enjoy this delicious chocolately drink :)
