
Protect yourself with a face mask and save US textile jobs!

1 message

Project Repat <madeinusa@projectrepat.com>

Dear Project Repat Customers,

We wanted to reach out and let you know that our worker-owned factory partner in North Carolina is now making [protective face masks](#). The CDC and many states have recommended voluntary face mask coverings for all US citizens, and we're here to help answer the demand. [These masks](#) are 100% cotton, and are good for going outside for walks or to the supermarket or pharmacy to add some protection. It is still important to social distance, wash your hands, and isolate if you are not feeling well. But these masks do provide protection, and by buying this product you are helping keep US textile workers employed. We are working around the clock to make as many as possible, but the demand is very high. Let's unite together to fight this pandemic, and protect ourselves and our loved ones.

By [purchasing this product](#), you're also supporting our factory as they make medical grade N95 masks for hospitals and health workers that need them most.

[BUY NOW](#) while supplies last.

And as always, you can [buy a t-shirt quilt for 40% off with this link!](#) Our factories are still open. Discount applied automatically at checkout and not available for mask purchases.

Thanks so much, and take care -

Abby, Erin, Nathan, and Ross

The Project Repat Team
